She stays connected.
We make it seamless.

Introducing VoiceLink:
the versatile companion microphone for miniTek from Siemens.

Life sounds brilliant.

Introducing VoiceLink

While miniTek links technology, VoiceLink™ connects people. Even with the most sophisticated hearing instruments, listening in crowded settings can be a challenge for some users. But not with VoiceLink – a companion microphone specially created for miniTek.

Based on secure Bluetooth transmission, VoiceLink provides excellent speech clarity by optimising the signal-to-noise ratio. This makes it particularly useful in difficult acoustic situations where background noise is present, such as airports, restaurants or conference rooms. Just like a standard microphone, VoiceLink is simply clipped to the speaker's clothing, near the mouth. Speech is then directly transmitted to miniTek, and from there to the hearing instruments. So it brings the speaker's voice straight to the user's ears. High-quality audio has never been so sophisticated – or so simple to enjoy.

VoiceLink is versatile and sounds great

Working as a companion microphone or as a Bluetooth transmitter, VoiceLink allows users to confidently partake in any number of difficult listening situations. VoiceLink's small size also makes it easy to carry in a pocket or clipped on to the wearer's shirt for discretion or convenience.

Long range Bluetooth streamer

In addition to great sound and versatility VoiceLink can work over great distances, in fact up to 20m in free field situations. This long streaming range means that users can freely move around in their normal day to day activities without suffering from signal interruption.

VoiceLink delivers high quality audio

Ranging from 100 Hz to 7 kHz VoiceLink provides the superior audio quality required to fully appreciate music, television, and telephone conversations as well as improving speech understanding of conversations in difficult listening situations.

VoiceLink provides users with versatility

So much more than just a companion microphone, VoiceLink is also a Bluetooth transmitter allowing users to sync up with all of their favourite electronic devices.

Technical details

- Bluetooth streamer and companion microphone compatible with miniTek
- 2.5 mm stereo input jack for connection to a number of electronic devices
- On/off and volume up/down buttons
- Rechargeable battery with up to 5 hours of talk time on one charge
- Up to 20m streaming distance
- 100 Hz – 7 kHz audio bandwidth
- Small and light (same size as the current Tek Transmitter)
- Includes plug in lapel microphone
- Programming in Connex is exactly the same as with the current 2nd Tek Transmitter

For more information, please contact your Siemens Account Manager or Customer Services on 01293 423700.

miniTek

As an ideal complement to Siemens hearing instruments (even custom models), miniTek™ lets users make the most of today's wireless lifestyle. It unites full audio streaming, remote control and multipoint phone connectivity in one small, stylish device. Using Bluetooth® wireless technology, miniTek streams stereo sound from landline and mobile phones, MP3 players, TVs and other audio sources directly to the user's hearing instruments. And it all happens at the push of a button.

Siemens miniTek was named "Next Category Winner" and "Fan Favourite Winner" at the "Bluetooth SIG Best of CES" awards.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Siemens Audiologische Technik is under license. Other trademarks and trade names are those of their respective owners.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

The required features should therefore be specified in each individual case at the time of conclusion of the respective contract.
