

Making life easy

Ever run out of batteries unexpectedly? Annoying, isn't it? Why not simplify things and say goodbye to weekly battery changes with the eCharger from Siemens.

This innovative product both powers and takes care of your rechargeable hearing instrument overnight, giving you the peace of mind to just get on with your day with perfect hearing.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

The required features should therefore be specified in each individual case at the time of conclusion of the respective contract.

**Stay in the loop.
Power up sustainably.**

eCharger. The rechargeable solution for care-free hearing.

Answers for life.

SIEMENS

Good for you, good for the environment

Now you can combine the best hearing experience with the knowledge that you're doing something that will benefit the next generation.

The reliability and convenience of just a single battery change each year, is also great for our environment, cutting down on waste batteries.

Simply place your Pure™ or Motion™ hearing instruments in the eCharger overnight, and within six hours they will be powered up, ready for your busy day ahead. In addition, the eCharger's Electronic Drying Function protects your hearing instruments from moisture damage ensuring long term reliability.

Powerful benefits

Ease of use

Improve your hearing without having to bother with all those tiny batteries.

Eco-friendliness

Your rechargeable hearing instruments reduce battery waste by using roughly 1 pair of batteries per year instead of nearly 52 batteries or more.

Reliability

Our eCharger dries and refreshes your hearing instruments overnight for maximum performance every day.

Convenience

After six hours of charging, the eCharger's indicator light tells you your hearing instruments are ready to go for your busy day.

Discretion

Rechargeable Pure and Motion instruments mean no more embarrassing dead battery surprises.

Mobility

Take charging on the road with our optional car charger accessory.

Siemens offers the most comprehensive range of hearing instruments on the market, so you're sure to find a solution that suits both your hearing loss and individual taste.

Pure

Pure is a line of rechargeable RIC (receiver-in-canal) hearing instruments that combines the most advanced hearing technology with an almost invisible, ultra-small size so you can be confident about the way you look and your hearing. Pure automatically adjusts your volume and program settings to match your surroundings for a completely customized hearing experience.

Motion

Motion is a family of rechargeable BTE (behind-the-ear) solutions that are tough enough to be low maintenance, yet gentle enough to be comfortable to wear. Motion lets you adjust the volume or programs to your liking, or you can go fully automatic and let the clever Motion do it all for you.

With both Pure and Motion, you can skip the hassle of changing your hearing instruments' batteries with our state-of-the-art eCharger.
